

# Hearings for Site Recommendation Consideration of the Yucca Mountain Site for Geologic Disposal of Spent Nuclear Fuel and High-Level Radioactive Waste

## Comment Sheet

RECEIVED

Name	Marjorie Sill	Organization	
Street Address	720 Brookfield Dr.		
City/State/Zip	Reno, NV 89503	Telephone number (optional)	775-322-2867
How did you hear about us? Have been following this for many years.			
Newspaper ad <input type="checkbox"/>	News coverage <input type="checkbox"/>	Public meeting <input type="checkbox"/>	Neighbors <input type="checkbox"/> Other <input type="checkbox"/>
<input type="checkbox"/> If you want to be on our mailing list to receive other Yucca Mountain Project-related information, check here. I already am.			

**Comments:** (If possible, please reference section and/or page number in document if applicable.)

1. The Yucca Mt study is scientifically invalid because (due to politics) only one site is being considered.
2. Questions of groundwater and seismic activity have not been adequately studied at the Yucca Mt. site.
3. The transportation issue has been ignored.
4. No alternatives to single site geologic disposal have been studied.
5. We need to rethink what we are doing. I favor on-site dry cask storage of present waste until a good solution for disposal is found. I also favor closing nuclear plants until the problem of waste disposal is solved or until fusion can be used so there is no waste problem.

Please note: For your comment(s) to be considered by the Secretary of Energy before a decision is made whether to recommend the site to the President, your comment(s) need to be received by the U.S. Department of Energy by September 20, 2001. To the extent practicable, the Department will consider comments received after September 20, 2001.

Please feel free to attach additional pages; more postage may be needed. If you prefer to mail your comments, you may use the back side of this sheet as a postage-paid, self-mailer. To do so, fold in thirds along the dotted line so address and postage-paid notice are visible, then secure with tape.
